Innovative Palm Oil Process Solutions

Raw Water & Effluent Clarification

Sawipac® Inclined Plate Clarifier is a combined flocculation and sedimentation unit for separating solid particles from raw water and waste water treatment system. The system is integrated with inclined plates to have large settling area in a compact space.

Benefits

- ✓ Reduced hydraulic retention time from 2 hours to 30 minutes
- ✓ Compact design - space saving
- ✓ Better water quality of clarified water
- ✓ All in one clarifier - Coagulation, flocculation and sedimentation
- ✓ Automatic desludging system
